DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 18-20 is withdrawn in view of the newly discovered reference(s) to Pinnow (4,931,789) and Saegusa (6,198,914). Rejections based on the newly cited reference(s) follow.
2. Claims 2-10,12-17,21-24 are allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Pinnow, U.S. Patent No. 4,931,789.

Regarding claim 18, Pinnow discloses a method of programming a handheld computer having a hardware abstraction layer, an operating system, and wireless communication capability to call an emergency service in response to user input, comprising the steps of:

programming the hardware abstraction layer (i.e., software program) to direct the operating system to dial the emergency service when a user activates a certain combination of input devices (i.e., keys) (col. 3, lines 13-67 and col. 9, lines 50-64).

Regarding claim 19, Pinnow discloses the method of claim 18, wherein the certain combination of input devices (i.e., keys) includes the depression of four keys (i.e., reads depression of two or more keys) (col. 9, lines 54-57).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pinnow, in view of Saegusa, U.S. Patent No. 6,198,914..

Regarding claim 20, Pinnow discloses the limitations of claim 18 but fails to explicitly disclose wherein the user must activate the certain combination of input devices for greater than one second.

In a similar field of endeavor, Saegusa discloses an emergency call system wherein if a user depresses the emergency call button for 3 seconds the emergent state detection signal is activated (col. 6, lines 25-45).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Pinnow to include a holding circuit for the purpose of effectuating a predetermined communication to reduce false alarms.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McNevin, U.S. Patent No. 6,028,915, discloses a method and apparatus for making an emergency call while on-line on a computer.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K Contee whose telephone number is 703-308-0149. The examiner can normally be reached on 5:30 a.m. to 2:00 p.m..
